

# Huntsville Toyota US Open Covid-19 Safety Plan

## Athletes:

- All athletes will be temperature checked prior to admission to the building.
- Athletes will need to bring a completed Covid-19 exposure questionnaire that will be provided upon entry as well. Questionnaire questions will include: Have you had a fever 100.0 or above within the last 10-12 days?, Have you had shortness of breath in the last 10-12 days?, Have you had contact with someone with known Covid-19 in the last 10 days?, Have you lost sense of smell or taste? Have you experienced diarrhea or vomiting in the past 24 hours?
- All athletes will be masked at all times that they are not in the water warming up, warming down, competing, or directly transitioning to one of those areas.
- Only two heats will be allowed behind the blocks at a time. Once the heat has been called to the blocks, the previous heat will exit as the next heat enters. Heats will exit toward the window side of the pool, and they will enter from bleacher side of the pool.
- Athletes are asked to keep 6 feet of separation in the warm-up and warm-down areas.
- Athlete seating will be on deck, and will have 6-9 swimmers per bleacher section; 3 swimmers on the top row, 3 swimmers on the bottom row, and 3 swimmers in the middle row. These spaces will be clearly marked. This will provide for as many as 81 spaces. The remaining athletes will be located in the stadium seats, with athletes separated in marked seat locations.
- Locker room usage is permitted, but athletes are required to maintain 6 feet of social distance, and wear their mask in the locker room.

## Volunteers and Coaches (Officials, computer and Colorado operators, timers, and meet marshals):

- All volunteer and coaches will be subject to a temperature check upon entry to the building.  
No volunteer or coach shall enter if they have experienced any fever over 100.0 degrees in the past 10 days, a shortness of breath in the past 10 days, contact with someone known to have Covid-19 in the past 10 days, lost taste and smell in the past 10 days, experienced diarrhea or vomiting in the past 24 hours?
- All volunteers will be required to wear masks at all times. Every effort to remain 6 feet apart from both athletes and other volunteers will be made.
- We will only have one timer per lane.
- Officials will be masked and maintaining 6 feet of separation as much as possible.
- Meet marshals will be positioned in a way that helps maintain 6 feet of distance from others, while being able to maintain control of the deck entry and deal with any potential safety concerns.
- Coaches will be in masks for the duration of the competition, and will maintain distancing as much as possible.

- Any other needed volunteers will be in masks, and maintain social distancing whenever possible.

#### Spectators:

- Spectators will be required to wear masks, and maintain 6 feet of social distancing from any non-family member.  
Spectators will be subject to a temperature check prior to entry. No spectator shall enter if they have experienced any fever over 100.0 degrees in the past 10 days, a shortness of breath in the past 10 days, contact with someone known to have Covid-19 in the past 10 days, lost taste and smell in the past 10 days, experienced diarrhea or vomiting in the past 24 hours?  
Entry for spectators will be through the concourse doors, with the entry door being the door closest to the lobby.
- The exit doors will also be through the concourse doors, with the exit door being the door farthest from the lobby.
- Concourse bathrooms will be open for spectators.
- Spectators will be asked to limit family attendance to 2 people per family when at all possible.
- Small areas(enough for 2-3 people to sit) will be marked in the bleachers every 6 feet. Areas will be marked every other row in the upper seating area.
- Approximately 250 spectators will be allowed in the facility at any one time.

#### Additional safety measures:

- There will be a 15 minute break in between flights to allow the first flight to exit, the area to be cleaned, and then the second flight to enter.
- Athlete seating areas will be disinfected in between flights and sessions.
- Timer chairs, stop watches, and “pickle” buttons will be wiped down in between sessions with disinfectant.
- Computer and Colorado stations will be wiped down if operator changes.

# GUIDELINES FOR ADULT AND YOUTH ATHLETIC ACTIVITIES

**In addition to the Safer at Home Order's mandates and the Guidelines for Safeguarding All Businesses, the following practices are strongly recommended for all adult and youth sporting activities and events.**

This guidance is intended for everyone participating in or watching youth or adult sports, including practices. These are minimum recommended health guidelines.

Players, spectators, and other participants should when possible minimize in-person contact with others not in their household, in part by maintaining 6 feet of separation from them. When maintaining 6 feet of separation is not possible, other methods should be used to slow the spread of COVID-19, such as, when not playing, wearing a face covering or mask and frequently washing or sanitizing hands.

## Health protocols for vulnerable populations:

Anyone participating in sporting events or practices should for the next 14 days minimize in-person contact with any person 65 years of age or older and people with chronic health conditions such as diabetes and heart disease. Minimizing contact includes maintaining social distancing of at least 6 feet from those individuals, wearing a face covering or mask when near them, and not sharing utensils or other common objects with them.

It is strongly recommended that all businesses associated with adult and youth sports follow applicable COVID-19-related safety guidelines from the Food and Drug Administration and the Centers for Disease Control and Prevention (CDC) publication, *Reopening Guidance for Cleaning and Disinfecting Public Spaces, Workplaces, Businesses, Schools, and Homes*, at <https://www.cdc.gov/coronavirus/2019-ncov/community/reopen-guidance.html>

## FOR ALL PLAYERS, VOLUNTEERS, SPECTATORS, AND EMPLOYEES:

- Screen yourself and any participating child for symptoms before coming to facilities with the following questions:
  - o Have you or the child been in close contact with a confirmed case of COVID-19?
  - o Are you or the child experiencing a cough, shortness of breath or sore throat?
  - o Have you or the child had a fever in the last 48 hours?
  - o Have you or the child experienced new loss of taste or smell?
  - o Have you or the child experienced vomiting or diarrhea in the last 24 hours?
- Screen for fever:
  - o Best practice: Have each participant's or spectator's temperature taken onsite with a no-touch thermometer upon arrival.

- o Minimum practice: People take their own temperatures, and those of their participating or spectating children, before arriving. A normal temperature does not exceed 100.4 degrees Fahrenheit.

- Anyone who exhibits COVID-19 symptoms (answers yes to any of the screening questions or who is running a fever) should leave the sporting event immediately, or not go to it, and seek medical care or COVID-19 testing or both.
- Increase hygiene practices: wash hands frequently, avoid touching your face, practice good etiquette when coughing or sneezing.
- Players, coaches, officials and spectators over the age of five shall wear a mask or other facial covering that covers his or her nostrils and mouth at all times except when a player or official is directly participating in the athletic activity.
- Keep six feet of social distancing between people of different households off the field of play and when practicable, on the field of play.
- Players, coaches, officials, and spectators should refrain from high fives, handshakes, and other physical contact except to the extent necessary—and only to the extent necessary—for players, coaches, and officials to directly participate in the athletic activity.
- Players, coaches, and officials should not share water coolers, drinking stations, water bottles, cups, or other drinking devices.

## Other Adaptations:

- Use at a game site when practicable a clearly designated entrance and a separate clearly designated exit to help maintain social distancing.
- Regularly and frequently clean and sanitize as often as practicable shared resources/equipment and high-touch surfaces such as balls, bats, and other athletic equipment, chairs, and restrooms.
- Make hand sanitizer, disinfecting wipes, soap and water, or similar cleaning or washing materials readily available at game sites.
- Encourage parent/guardian supervision for all children, in part to ensure that children comply with guidelines.

At facilities where food or beverages are served:

- Follow the previously issued *Guidelines for Restaurants and Bars* found here <https://www.alabamapublichealth.gov/covid19/assets/cov-sah-restaurants-bars.pdf>
